TMA 2020 Annual Meeting
Oct. 27-29
Unprecedented times. Unlimited Discovery.

Register early and SAVE!
TMA members who register by August 31 to attend the Annual Meeting or OPS-TECH will save!

	Early Bird	Regular
Annual Meeting	\$400	\$450
OPS-TECH	\$400	\$450
Both Events	\$720	\$800

Look for additional registration options and special rates for 3 or more from one company at www.tma.us.

OPERATION MISSION POSSIBLE
▪ Operations | Video – Nov. 9-12
▪ Technology – Nov. 17-18
Creating a Safer World Through Professional Monitoring

UL
Work Group

UL is the SDO

Task group Chair

- Stakeholder SME
- Monitoring SME's
- Tech and Biz SME's
- Other SME's

TMA UL Task-Group Activities

Chair – Anita Ostrowski, Vector Security

- Sections updated in UL 827 (37.2, 17.2 and 12.1-12.5)
- Offered recommendations to UL 2610, UL 681 and UL 1981 to keep in line with UL 827 changes
- Virtual Workplace Requirements language proposed in 827 (TMA and UL)
 - Now in Public Comment, Closes 8/31
- UL 827A (Hosted Central Station) into UL 827
- UL will be conducting virtual annual audits
- UL Standards Roadmap
- Possible Model Ordinance recommendations

UL Standards & Program Roadmap

*Steve Schmit,
Underwriters Laboratories, LLC
Senior Staff Engineer*

TMA – Together, Moving Ahead.

TMA Confidential

UL Standards & Program Roadmap

- Virtual Workplace (WFH) monitoring (Sept-2000 revision target)
 - Phase 1 Emergency Conditions
 - Phase 2 Long Term Conditions
- UL Annual Audit Approach
 - New WFH requirements Q3/Q4
 - Virtual Audit techniques
 - Cybersecurity & secondary power requirements published 2019/04/11
- Hosted Central Station Services – Merge 827a into 827
 - Bring current requirements into the ANSI Standard
 - Develop public cloud use requirements

TMA Confidential

UL Standards & Program Roadmap

- Alarm Confirmation, Verification and Notification Procedures
 - Harmonize UL827 & ANSI/TMA CS-V01
 - Optimize public and AHJ understanding of UL/Industry alignment
- Monitoring Station Certification Category Restructure
 - Collaborative discussion with industry, AHJs, stakeholders

APCO ASAP Committee

APCO ASAP
ANSI Committee

APCO is the SDO

TMA Committee
Members

- ASAP SME's
- Monitoring Center Mgmt
- IT/Data SME's

- APCO is the SDO
- Chair, Bill Hobgood, appointed by APCO
- TMA representative is a co-chair
- TMA has five representatives on the ANSI committee that provide functional expertise
 - Jay Hauhn (co-chair)
 - Morgan Hertel
 - Tom Nakatani
 - Anita Ostrowski
 - Glenn Schroeder

TMA NFPA Task-Group Activities

NFPA 72
Work Group

NFPA is the SDO

Task group Chair

- Interestec stakeholders
- Fire SME's
- Monitoring SME's

Chair – To be appointed

- NFPA 72 – National Fire Code
 - 2022 Version “in cycle”
 - Adopt “Tentative Interim Amendment” for Work From Home” monitoring
- TMA representation on NFPA 72 Correlating Committee

Contact Glenn Schroeder if
interested in chairing NFPA
work-group

TMA-AVS-01 Alarm Validation Standard

*Don Young,
TMA President*

TMA – Together. Moving. Ahead.

TMA Confidential

ANSI Project Initiation (PINS)

Abstract of Project:

The increasing use of data by Public Safety has had a positive impact on the services they provide to the public. Datasets generated by commercial sources, such as the alarm industry, can be a valuable data source to Public Safety. Real time data from security providers will improve situational awareness as well as first responder safety. Sensor innovation driven by technological advances has raised the quantity and quality of data collected by alarm systems.

Alarm monitoring centers can use this data to estimate the validity of an alarm event, which enables the creation of standardized "alarm scoring" metrics. Calls for Service to Emergency Call Centers/Public Safety Answering Points that include a standardized scoring metric can assist public safety departments that opt-in to the program, with their alarm response policies, similar to how Location accuracy and Crash Severity scoring are used.

Project Need

Public Safety officials in municipalities establish alarm response policies specific to their jurisdiction. Such an ANSI standard will be created cooperatively with Public Safety stakeholders. Alarm scores would be calculated by an alarm monitoring center process and technology.

Alarm scores transmitted to Public Safety in a standardized manner minimizes workflows within Public Safety. It allows Public Safety to take advantage of the data without the burden of receiving and analyzing it themselves. Additionally, the standard can enable processes for data relative to a Call for Service, to be "pulled" by Public Safety on demand.

TMA Confidential

TMA-AVS-01 Chair

Experienced Electronic Security Professional with a demonstrated history of working in the electronic and physical security industry. Skilled in Electronic Security monitoring operations, including Video and Audio Monitoring solutions, Corporate Security, and Systems Design. Strong information technology, monitoring operations and executive level administration professional as well as project/program management.

Predicting Injury Severity

• Predicting Injury Severity

A decade of data from National Automotive Sampling System Crashworthiness Data System (NASS CDS) used to create and validate the Injury Severity Prediction algorithm.

Examples:

Criteria	Data	Criteria	Data
Delta V	12 MPH	Delta V	35 MPH
Seatbelts	In Use	Seatbelts	Not in use
Multiple Impacts	NO	Multiple Impacts	YES
Rollover	NO	Rollover	YES
Injury Severity	NORMAL	Injury Severity	HIGH

AACN to PSAP Workflow (Today)

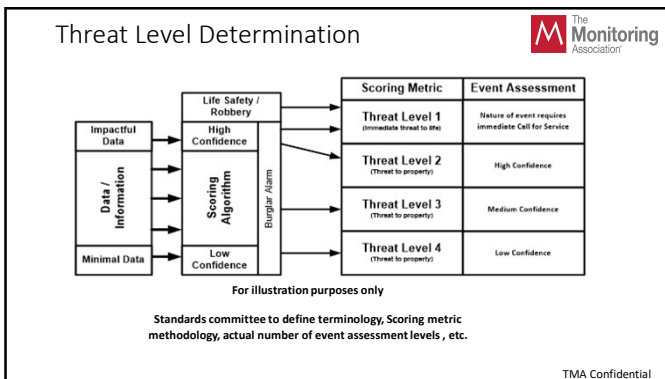

- Upon crash, vehicle initiates a wireless call to the TSP, transmits VEDS data
- TSP assesses the situation, predicts injury severity, notifies 911 by phone
- TSP operator verbally transmits select data to the 911 calltaker
- 911 continues caller interrogation, uses CAD to dispatch responders

Schedule - ANSI Compliance

Task	Notes/explanation	Target Completion	Actual Completion
Identified at LSP as a strategic TMA initiative	Reviewed strategy with LSP attendees		Feb 2020
File PHS	Target April		Apr 2020
TMA EC Approval	EC call		
Brief partnership email to Public Safety ED's	ASAP after PINS. Email from TMA ED. Give PubSaf ED's a heads up		May 2020
Pre-committee effort - create outline	Workgroup		Aug 2020
CISC Consensus-body notification	ANSI required "Consensus" body		Aug 2021
Full notification to Public Safety ED's	Provide letter than explains TMA AVS 01 in more detail. Ask associations to assign a committee member		Jul 2020
Public notification/call for committee members	Call for committee membership is required		Jul 2020
Announce committee membership - balance 1	Publish committee members list	Aug 2020	
First committee call - Review draft outline/feedback		Aug 2020	
Next committee call	Committee work - activity determined by chairs	Rhythm	Anytime
Workgroup/committee calls - review work product	Regularly scheduled committee calls	every 2 weeks	Rhythm
Final call before BSR-8	Initial public comment period	Jan 2020	
File BSR-8	Notice to ANSI initiate public comment period	Jan 2020	
Public comment period	45 days per ANSI best practice		
Compile and distribute public comment to committee	Committee review	Mar 2020	
Committee calls - review public comment	Committee review	Apr 2020	
Complete proposed document	Final document after public comment period. Substantial change based on public comment could require additional public comment period.	Apr 2021	
CISC Consensus-body vote	SISC approval required at ANSI requirement for a "consensus body" approval	Apr 2021	
File BSR-9	Notify ANSI that the work is done and standard is ready for publication	May 2021	
Publication by ANSI of new ANSI	Completion requires ANSI acceptance	May 2021	

TMA-AVS-01 Committee Membership

Call for Participation (ANSI best practice)

- Multiple announcements from TMA

"Balance" (ANSI requirement)

- Alarm Monitoring
- Public Safety
- Manufacturer/Software Provider
- Service Provider
- Special Expert/NRTL
