## **The Monitoring Association Launches Newly-designed Learning Management System**

*The new TMATraining.org delivers increased ease of use and accessibility for users*

**August 31, 2021, McLean, VA** – The Monitoring Association’s (TMA) is pleased to announce the launch of its newly-designed learning management system, known as the TMA Learning Center or TLC. TMATraining.org features a dynamic, expanded training catalog and includes a topic-based index with full shopping cart capability and training management options through our popular training manager portal. The Continuing Education menu allows students to find courses recognized for CEUs by various state licensing boards.

TMA Vice President for Education and Training Julie N. Webber stated, “We are excited to introduce our members and other monitoring center professionals to this easy to navigate updated resource for industry-specific education and training. The timing of TLC is important with the launch of our recent operator recertification requirement. Those engaged with any area of professional monitoring should tour the site to learn more about the full portfolio of online training TMA has to offer. Our focus as a trade association is to provide high-quality training for monitoring professionals.”

TMA partnered with The CMOOR Group (CMOOR), owners and operators of SecurityCEU.com, to upgrade and redesign the education portal.

### **About The Monitoring Association**

The Monitoring Association (TMA), formerly the Central Station Alarm Association (CSAA), is an internationally-recognized non-profit trade association that represents professional monitoring companies, security systems integrators, and providers of products and services to the industry. Incorporated in 1950, TMA represents its members before Congress and regulatory agencies on the local, state and federal levels, and other authorities having jurisdiction (AHJs) over the industry.
