

The Alarm Industry Communications Committee (AICC), a committee of The Monitoring Association (TMA), is composed of representatives of TMA, the Electronic Security Association (ESA), the Security Industry Association (SIA) and major alarm companies and manufacturers.

What does AICC do?

- Provides coordination in a variety of areas between the alarm industry and the FCC, other regulatory agencies, and members of Congress, when needed.
- Monitors developments at the federal level affecting the ability of the alarm industry to use telecommunications technology in providing protection services to the public.
- Retains a Washington, D.C. law firm specializing in alarm industry issues to advise AICC on wireline and wireless issues. The firm is available to engage in advocacy when AICC determines that such effort is warranted.
- Retains a lobbyist who advises AICC on legislative developments affecting the alarm industry. This lobbyist is available to assist in attaining legislation addressing alarm industry issues.

Stay Abreast of Federal
Legislation and Agency
Regulatory Affairs

Engage with Industry
Colleagues and Leading
Technology Experts

Acquire Valuable Market
Intelligence, Strategies,
and Insights

How will your company benefit from membership in AICC? *It will:*

- Acquire valuable market intelligence on telecommunications issues to develop effective timely strategies and make sound, data-driven business decisions.
- Stay abreast of federal legislation and agency regulatory affairs that may impact your business today and in the future.
- Have early-access and first-hand insight into telecommunications providers' technology development and service delivery plans.
- Have the opportunity to participate with other business leaders in the monitoring community to address key industry concerns at the federal level.
- Increase your competitive advantage in the marketplace.
- Gain a deeper understanding of the importance of the communication path to your operations.
- Engage with industry colleagues and subject matter experts to deepen knowledge.

Meetings and Dues

The Committee meets quarterly (March, June, September, December) usually in Washington, DC. In-person and virtual options are currently offered. Dues are based on annual revenue. Refer to the membership application for details.

NEW! AICC Has Established a UHF Special Interest Group (SIG)

AICC recently established a UHF SIG. AICC members in good standing can participate in the SIG with no additional membership fee. The purpose of this SIG is to provide a forum for AICC members to discuss challenges and opportunities relevant to UHF communications and to stay up-to-date on critical issues. Participation in certain advocacy or lobbying campaigns may require contributions above the AICC membership fee.

Visit www.AICCweb.org to apply for membership.
