

The New 837 Area Code is Coming to the California 530 Area Code Region

To ensure a continuing supply of telephone numbers, the California Public Utilities Commission has approved an all-services overlay for the 530 area code. The 530 area code serves most of northeastern California, covering all or portions of Alpine, Butte, Colusa, El Dorado, Glenn, Humboldt, Lassen, Modoc, Mono, Nevada, Placer, Plumas, Shasta, Sierra, Siskiyou, Solano, Sutter, Tehama, Trinity, Yolo and Yuba counties. It serves communities such as Chico, Davis, El Dorado Hills, Oroville, Paradise, Placerville, Red Bluff, Redding, South Lake Tahoe, Truckee, Woodland, and Yuba City, as well as unincorporated areas. The new 837 area code will serve the same geographic region currently served by the 530 area code.

What is an Area Code Overlay?

An overlay is the addition of another area code (837) to the same geographic region as an existing area code (530). The overlay does not require customers to change their existing area code or phone numbers, or how they make calls. Customers will continue to dial 1+10 digits (area code + phone number) for all local calls, as they today, within and between the 530 and 837 area codes. Mobile phone customers will continue to dial either 10 digits or 1+10 digits.

Who is affected and when does the new 837 area code become effective?

Beginning **January 31, 2025**, customers in the 530 area code region may be assigned a number in the new 837 area code when they request new service or an additional line. Customers receiving the 837 area code will be required to dial 1+10 digits for all local calls, just as customers with telephone numbers from the 530 area code do today. Mobile phone customers receiving 837 numbers may dial either 10 digits or 1+10 digits.

What will customers need to do?

Customers in the overlay region should:

- Continue to dial 1+10 digits for all local calls, including calls within the same area code.
- Continue to identify their telephone number as a 10-digit number, and include the area code when giving the number to friends, family, business associates, customers, and others.
- Ensure that all services, automatic dialing equipment, or other types of equipment recognize the new 837 area code as a valid area code and continue to store or program telephone numbers as 10-digit numbers. Some examples are: stored telephone numbers in contact lists in cordless or wireless phones, PBXs, fax machines, Internet dial-up numbers, speed dialers, call forwarding settings, voicemail services, medical alert devices, safety alarm security systems and gates, ankle monitors and/or other similar equipment.
- Check items such as websites, personal and business stationery, printed checks, advertising materials, contact information, and personal or pet ID tags to ensure the area code is included.

What will remain the same?

- Telephone numbers, including the current area code.
- The price of a call, coverage area, or other rates and services will not change due to the overlay.
- What is a local call now will remain a local call.
- Customers will continue to dial 1+10 digits for local calls within and between the overlay area codes, and 1+10 digits for long distance calls.
- Customers can still dial just three digits to reach 911 and 988, as well as 211, 311, 411, 511, 611, 711 or 811 if those are currently available in their community.

Who may customers contact with questions?

If customers have any questions regarding information provided here, they should contact their local service provider. Customers may also visit the California Public Utilities Commission website at www.cpuc.ca.gov/530areacode.
